I. SITUATION OVERVIEW

A. CHRONOLOGY OF TROPICAL STORM JUANING

July 25, 2011

- A Low Pressure (LP) located at 350 km east southeast of Virac, Catanduanes developed into a Tropical Depression (TD) named "JUANING", moved closer towards Virac, Catanduanes and threatened the Isabela-Cagayan area

July 26, 2011

- TD "JUANING" moved towards Daet, Camarines Norte and intensified into a tropical storm and threatened Southern and Central Luzon including Metro Manila

July 27, 2011

- TS "JUANING" intensified further before it made landfall over Dinalungan, Aurora at 10:00 AM, but slightly weakened while it crossed the rugged terrains of Northern Luzon, traversed West Philippine Sea and headed towards Southern China

July 28, 2011

- TS "JUANING" re-intensified while over the West Philippine Sea, maintained its strength as it moved out from the Philippine Area of responsibility (PAR). However, TS JUANING will continue to enhance the Southwest Monsoon and bring rains over the western sections of Luzon and Visayas
